

Fully automatic permanent magnet lifter

◆ Basic Parameter:

Capacity: 100kg-20T

Size: Customized

Description

The fully automatic permanent magnet lifter requires no manual operation of the handle. It relies on the lifting and lowering control of the electric crane hook to attract and lift corresponding round steel bars and steel plates. It does not require electricity, is safe to use, and is widely used for lifting and handling steel materials, as well as for the installation and handling of flat mechanical parts and various molds.

Features

Permanent magnetic lifter are characterized by their small size, stronger holding force, no need for electricity, almost zero residual magnetism, and high safety factor.

1. Pure machinery does not need to be connected to electricity, saving labor and electricity costs.

2. Core magnetic material is custom made high performance NdFeB strong demagnetization rate is 5 / 1000 / 3 years
